

An Electronic Discovery Company

### Simple FACTS of Data Loss Prevention (DLP)

Recent surveys show that the average Fortune 200 Company faces 305 suits at any one time (hence the need to provide data in a timely manner)

That number jumps to 556 to companies with \$1 billion or more in revenue

Up to 80% of corporate data assets reside on unprotected PCs and laptops

2,000 laptops are lost or stolen every day

Most confidential business or IP data loss is not reported, or worse, the company is likely not to know what was lost or exposed until the problem is reported, after the fact.

6 West 18<sup>th</sup> Street, Ste 2A,

New York, NY 10011
